MADE IN GERMANY

 德国制造

型号	应用领域说明	Application
全浸式潜水泵 Submersible motor pump, fully immersed		
TMP		标准型潜水泵，适用于泵送干物质含量较低的畜禽粪尿储存池、污水储存池、发酵罐中的液体。也可用作带底盘的移动泵。
TMHP		高压潜水泵，适用于泵送干物质含量较高的畜禽粪尿储存池、污水储存池、发酵罐中的液体。
非全浸式长杆泵 Long-shaft pumps for pits, motor not immersed		
LKP		标准型长杆泵，适用于泵送干物质含量较低的畜禽粪尿储存池、污水储存池中的液体。
LHP		高压长杆泵，适用于泵送干物质含量较高、输送距离较远、输送扬程较高的畜禽粪尿储存池、污水储存池中的液体。
容积泵，适用于泵送畜禽粪尿，无需浸入即可泵送（自吸） Displacement pump to pump over slurry, suction without immersion (self-priming)		
DKP		转子泵，适用于泵送长距离的畜禽粪尿。
HEX		偏心螺杆泵，适用于泵送长距离、低磨损的畜禽粪尿。使用寿命长。
切割系统保护泵不受异物的影响 Cutting system protects the pump from impurities		
SF		从粪尿中滤出异物（木块、石头），提高泵的使用寿命。
高压液体输送离心泵 High pressure centrifugal pump for liquid feed		
HKP		为畜禽泵送液体饲料。

TMP3潛水泵

Submersible motor pump

严格的标准生产出高效率的泵

电机功率4.0 - 22.0 kW

- 三相电机400 V, 50 Hz, 1,450 rpm
- 防护等级IP68，隔热等级F=155° C
- 过热保护：每相单独热动控制
- 电机外壳材质：1.4301不锈钢（德标，相当于中国304不锈钢）
- 泵外壳材质：铸铁，表面由双组分塑料漆喷涂
- 加大型泵内腔，有效防止堵塞
- 泵叶轮和切割装置由硬质合金加固
- 底座采用带切割功能和缠绕保护的热镀锌钢板
- 轴密封采用带有径向轴密封圈的耐酸硬化密封圈
- 电缆防水防潮保护，采用特殊的PU外保护套
- 1.4301不锈钢滑动轴承和进料口法兰

High efficiency through standards of perfection

Electric motors 4.0 - 22.0 kW

- Three phase motors 400 V, 50 Hz, 1,450 rpm
- IP68 protection category, insulating category F = 155° C
- Thermo-control for each phase as overheating protection
- Motor housing in 1.4301 stainless steel
- Pump housing made from cast iron material coated with 2-component plastic lacquer
- Large pump housing and therefore resistant to blockages
- Pump impeller with intake auger and chopping mechanism with tungsten carbide wear protection
- Galvanized steel suction plate with cutting edges and winding protection
- Sealed with radial shaft seal rings on special acid-resistant hardened rings
- Electric cable with water-blocking devices in the longitudinal direction of the cable for moisture protection; special PU outer sheathing with moulded connection
- 1.4301 stainless steel slide bearing and absorb flange

Stallkamp的高性价比潜水泵是多年经验和持续改进的结果。它们运行可靠、安全、强大、高效和环保。可在各种环境条件下使用。

特征:

- 在恶劣环境条件下也有非常好的工作表现
(在粪污和沼气项目中的应用)
- 螺旋形剪切刃和加大容积的泵壳，有效防止堵塞
- 热动控制作为标准配置，防止过热损坏
- 可耐受介质温度高达50°C
- 表面平滑的设计防止纤维缠绕
- 节省空间的设计
- 配件通用性强

Stallkamp submersible motor pumps are the result of experience and consistent development.

They run reliably and safely, are powerful, effective and eco-friendly at the same time.

Your benefits:

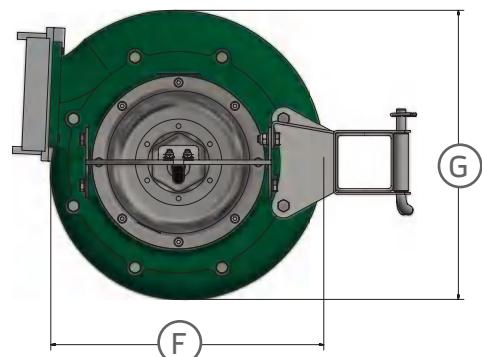

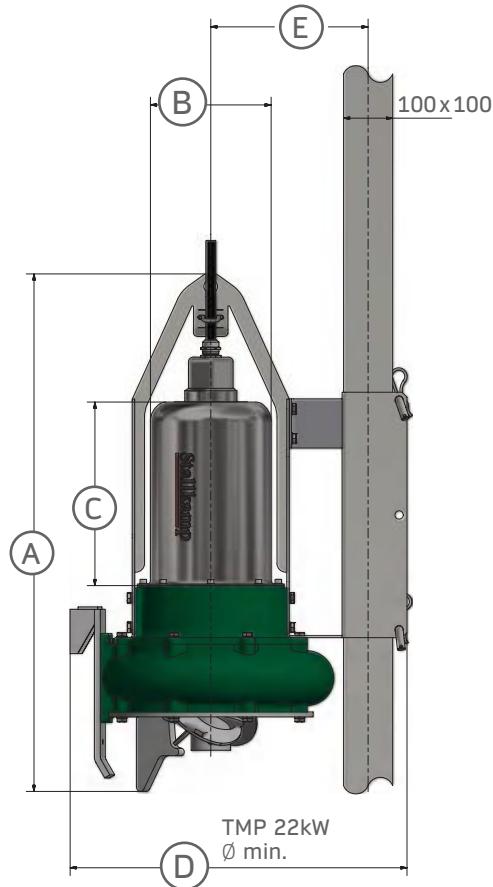

- Top performance under tough conditions
(application in manure and biogas plants)
- Spiral shaped shearing edge and large volume housing
to prevent blockages
- Thermo-control is installed as standard to prevent
damage from overheating
- Pumping medium temperature up to 50° C
- The smooth design prevents the accumulation of
fibrous materials
- Space-saving design
- A wide range of accessories

带有起吊装置和管口连接件的TMP泵
TMP with lifting gear and coupling foot piece
for elevated tanks or closed pits

进料口处用碳化钨镀层的切割装置
Tearing device at the suction
opening plated with tungsten
carbide

供给泵 (含支架、泵、管道、爬梯、工作平台等)
Tank filling station over tank wall, incl. support.
Submersible motor pump incl. guide rail, lifting gear, working platform

三轮移动泵

- TMP三轮支撑底盘
- 热镀锌三轮底盘
- 轨道宽度1.05-1.65m
- 带不锈钢钢丝绳的安全绞车
- 热浸镀锌伸缩式导轨，最深5.20 m
- 池子最小开孔尺寸 900 x 600 mm
- 充气轮胎和刹车系统
- 带CEE插头的星--三角保护开关

Trio-Port chassis

- Trio-Port chassis for TMP
- Hot-dip galvanized three-wheel chassis
- Track width adjustment of 1.05–1.65 m
- Safety cable winch with stainless steel wire cable
- Hot-dip galvanized telescopic guide rail down to 5.20 m pit depth
- Minimum pit opening 900 x 600 mm
- Air-filled tyres and brake
- Star-delta motor protection switch with CEE connector

三轮移动泵适用于各种覆盖的池子
The mobile submersible pump with chassis to pump at different pits.

TMHP3高压潜水泵

Submersible motor high-pressure pump

Stallkamp 高压潜水泵是多年经验和持续改进的结果。它们运行可靠安全，高效，环保。

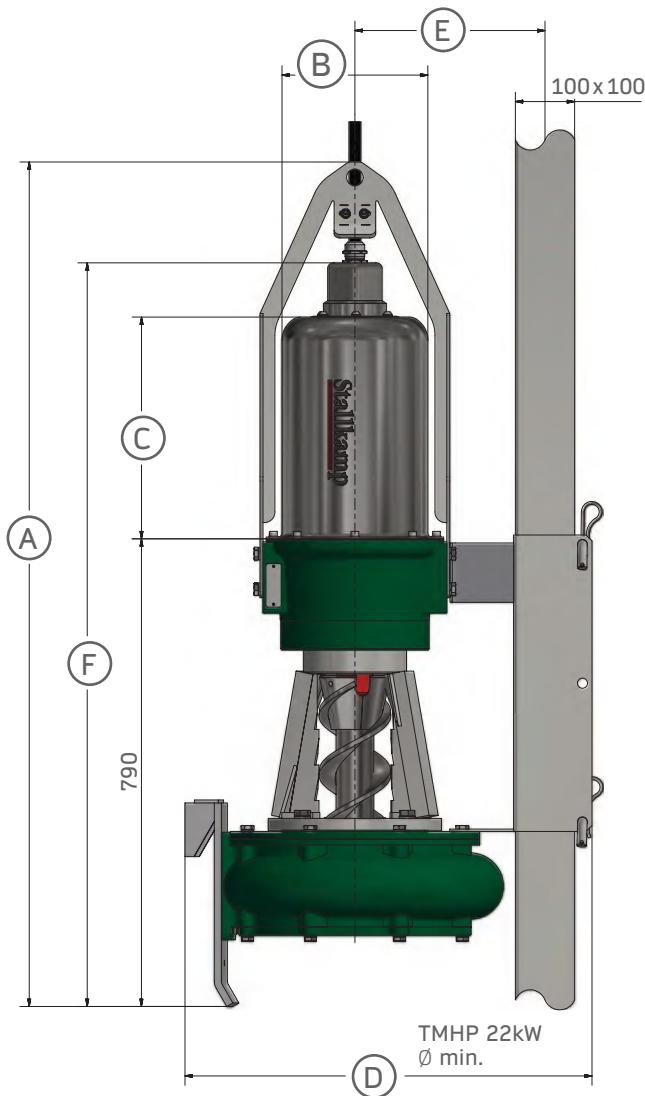

特征:

- 输送压力强
- 泵壳内无气体聚集
- 在最恶劣的条件下依然表现最佳
(尤其适用于粪尿和沼气项目)
- 螺旋形剪切边缘和大容量壳体防止堵塞
- 过热保护作为标准配置，防止过热损坏
- 泵可承受介质温度高达50
- 表面光滑的设计可防止纤维缠绕
- 省空间的设计
- 配件通用性强

Stallkamp submersible motor high-pressure pumps are the result of experience and consistent development. They run reliably and safely, and are powerful, effective and eco-friendly at the same time.

Your benefits:

- High delivery pressures
- No gas build-up in pump housing
- Top performance under the toughest conditions
(can be used in manure and biogas plants)
- Spiral shaped shearing edge and large volume housing
to prevent blockages
- Thermo-control is installed as standard to prevent
damage from overheating
- Pumping medium temperature up to 50° C
- The smooth design prevents the accumulation of
fibrous materials
- Space-saving design
- A wide range of accessories

in tank or pit

收集池内的高压潜水泵
Submersible motor high pressure pump with
distributor housing, agitating nozzle and bracket

LKP长轴泵

Long-shaft centrifugal pump

在极端恶劣条件下仍可正常使用！

长轴离心泵标准配置

- 泵外壳材质：铸铁，表面由双组分塑料漆喷涂
- 加大型泵内腔，有效防止堵塞
- 叶轮和进料口采用碳化钨硬质合金
- 带有切割装置和防缠绕装置的热镀锌底座
- 轴密封采用的是耐酸径向轴密封圈
- 驱动轴贯穿油槽，不锈钢套管
- 配备检查油位的油尺
- 弹性联轴器（仅限电机驱动）
- 过热保护：每相单独热动控制

**For permanent use under
extreme conditions!**

Long-shaft centrifugal pump standard equipment

- Pump housing made from cast iron material coated with 2-component plastic lacquer
- Large capacity pump housing and therefore resistant to foreign bodies and blockages
- Pump impeller with intake auger below and chopping mechanism made from applied tungsten carbide
- Galvanized steel suction plate with cutting edge and winding protection
- Pump bearings and seals with radial shaft seal rings on special acid-resistant hardened rings
- Drive shaft running through oil bath, casing tube made of stainless steel
- Dipstick in casing tube for checking oil levels
- Stretch coupling (in electric drive only)
- Thermo-control for each phase as overheating protection

Stallkamp长轴离心泵是重型泵，可适用于泵送深达6.0m池深的物料。无论是使用电机（最大22kw/30hp）驱动还是拖拉机PTO动力驱动，长轴泵都有力而持久！尤其是在液体泵送或者管道冲洗上，都十分得心应手。

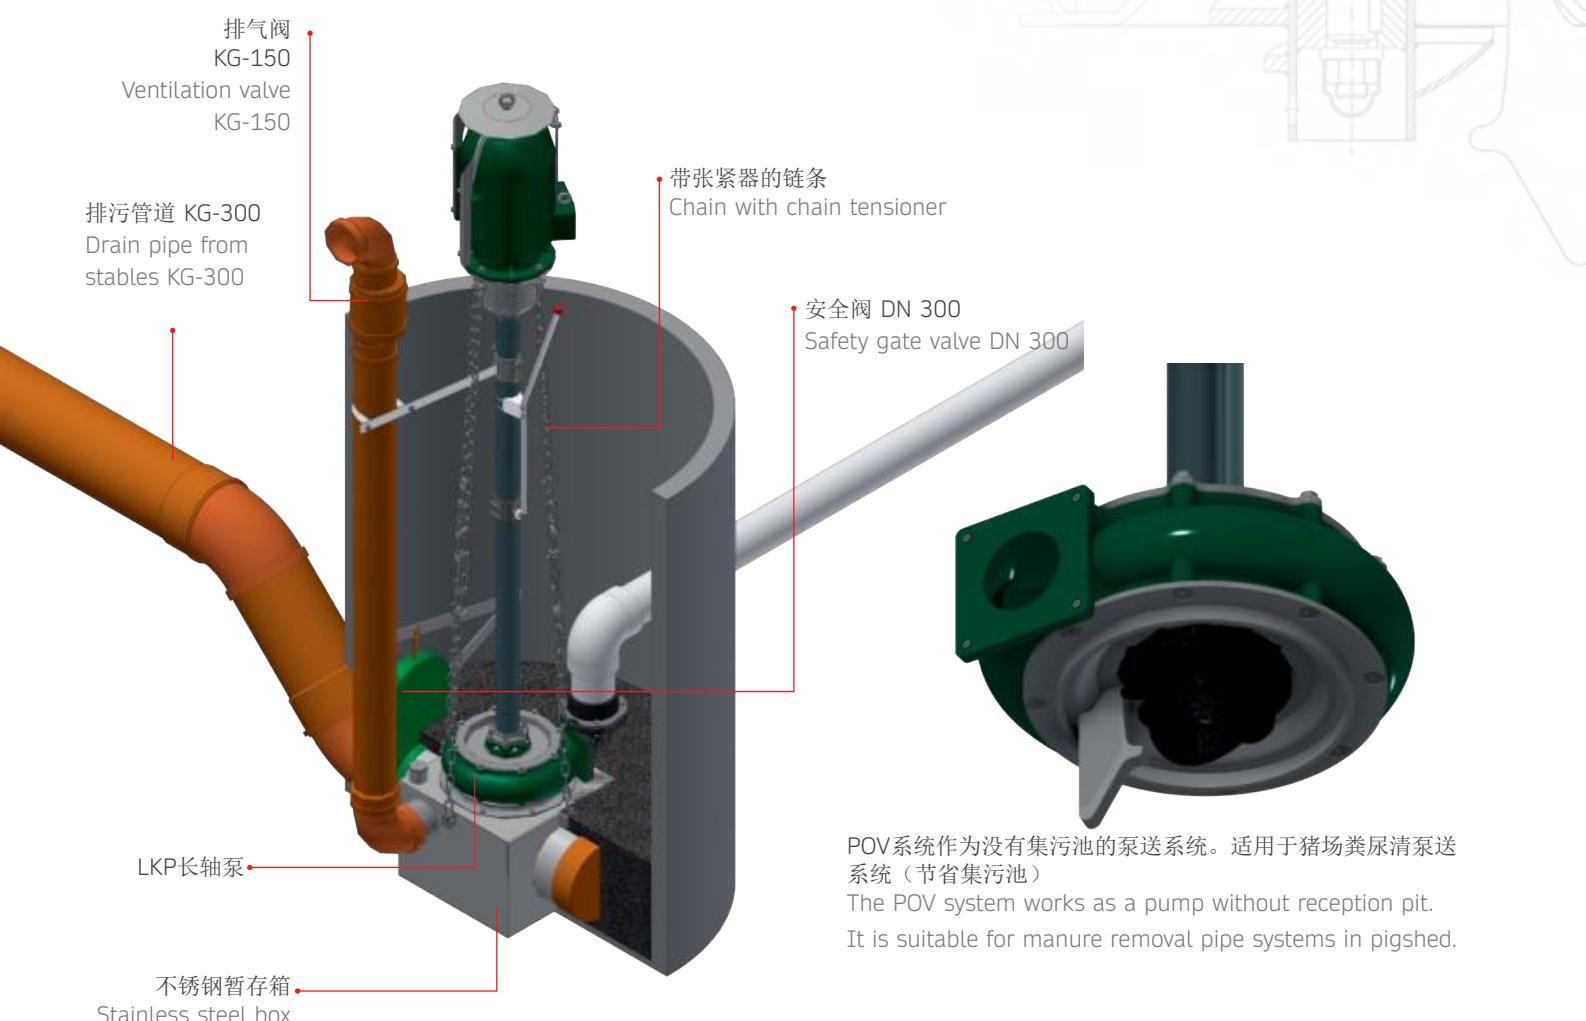

特征：

- 几乎不受异物和堵塞的影响
- 弹性联轴器，使用寿命长
- 将粪尿中的青贮或秸秆纤维切碎
- 大流量和高扬程（输送压力大）
- 可承受泵介质温度高达70°C
- 灵活性得益于完美的标准和通用的配件
- 电机驱动或PTO驱动（拖拉机）

Stallkamp long-shaft centrifugal pumps are heavy duty and are perfectly suitable for reception pits and manure pits to a depth of 6 m. Either with sturdy electric motors (up to 22 kW/30 PS) or PTO-driven, Stallkamp long-shaft pumps are a powerful and long-lasting centrepiece especially for manure and biogas plants with both fixed piping systems and flushing pipes.

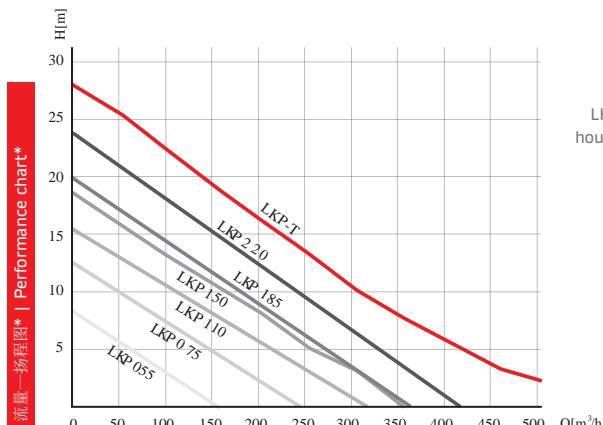

Your benefits:

- Virtually unaffected by foreign bodies and blockages
- Long lifespan thanks to a stretch coupling (in electric drive only)
- Fibres of silage or straw in the manure are shredded
- High flow rates and delivery pressures
- Pumping medium temperature up to 70 °C
- Flexibility thanks to perfect standard equipment and a comprehensive range of accessories
- Electric or PTO drive

DKP转子泵

Rotary lobe pump

高效和使用寿命长

- 多种驱动方式
- 固定式或者移动式使用
- 吸力恒定
- 恒压
- 最高压5.0bar
- 最大流量可达250m³/h

Power pack with long operational life

- Various drive versions
- Stationary or mobile application scenarios
- Constant suction performance
- Constant pressure performance
- High pressurisation to max. 5 bar
- Flow rate to approx. 250 m³/h

Stallkamp 一贯注重效率。这意味着，我们的转子泵非常耐用，即使在很高压力的情况下，也可以保持恒定的流速，同时保持最低的维护费用。最重要的是：在其他品牌的泵达到使用寿命时，我们的泵只需要更换易损件即可继续使用。

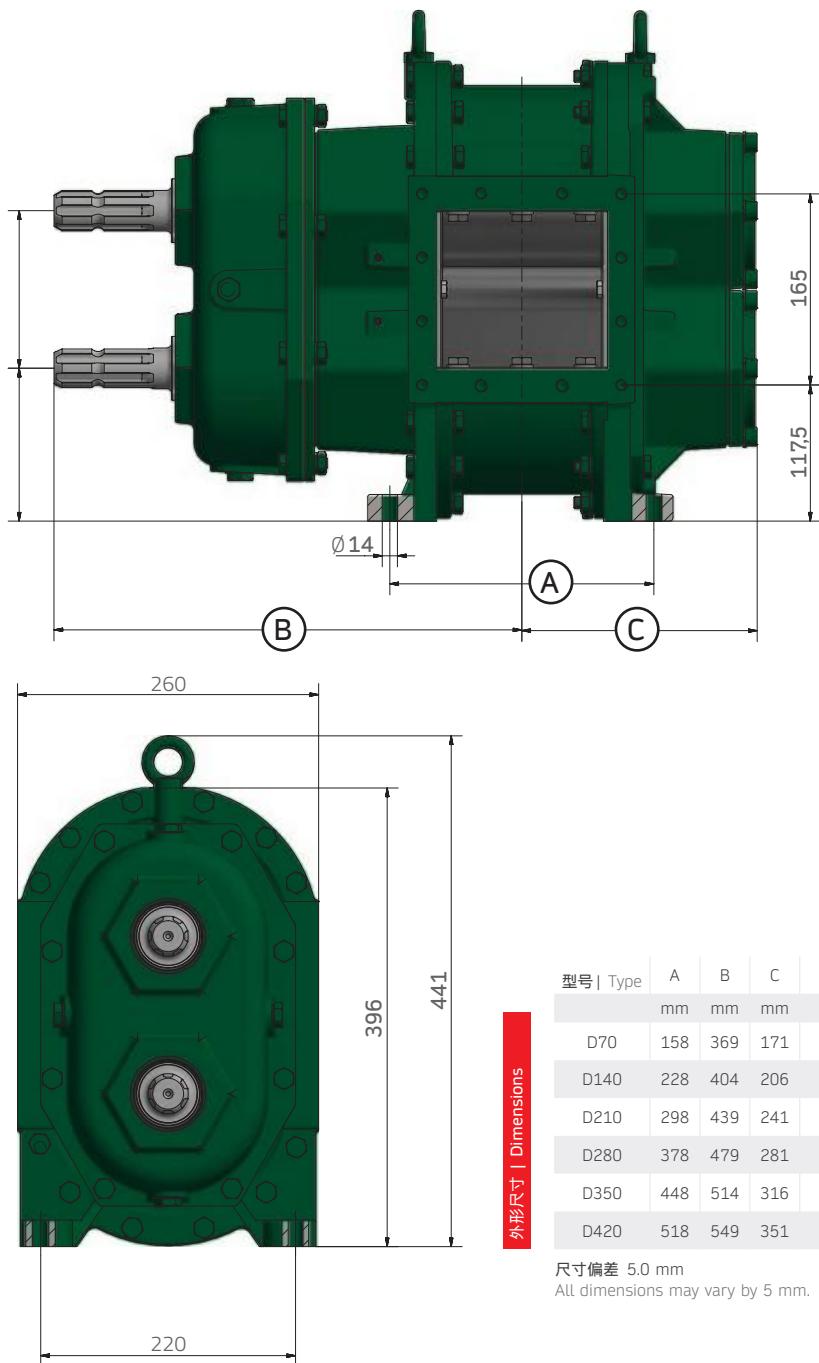

特性：

- 只需几步就可进行快速转子更换的模块化设计
- 非常耐用
- 几乎没有故障停机时间
- 轴承在两侧更稳定

Stallkamp keeps a consistent focus on efficiency. This means that our rotary lobe pumps are extremely durable, even under heavy strain, and can take high flow rates while keeping maintenance costs to a minimum. And the great thing about it: Where other pumps reach the end of their service life after pumping so many m³, our pumps only require new wearing parts.

Your benefits:

- Modular design for quick piston change in just a few steps
- Extremely durable
- Nearly no downtime
- Bearings on both sides for more stability

* 理论流量 | Theoretical flow rate

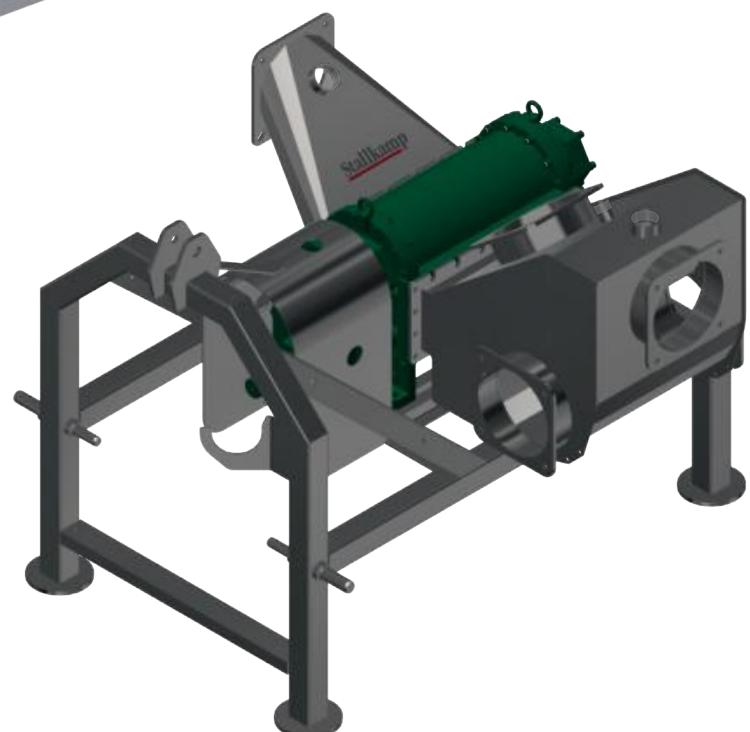

流量（体积流速L/m³）取决于液体的密度和粘稠度，粪尿（或液体饲料）的类型和干物质含量，泵送高度和距离，以及管道的直径。

The flow rate (volume flow rate in m^3) is dependent on the density and viscosity of the liquid, the type and the DM content of the manure (animal feed), the support height and distance and the diameter of the pipeline.

电驱动转子泵安装在热镀锌的支架上

Rotary lobe pump with electric drive motor
on hot-dip galvanized skid

拖拉机驱动转子泵安装在热镀锌三点悬挂架上
Rotary lobe pump for tractor drive on
hot-dip galvanized three-point headstock

HEX偏心螺杆泵

Eccentric screw pump

可泵送多种介质的泵

标准配置：偏心螺杆泵

- 连续运行的高效率的偏置驱动电机
- 采用双轴承和油浴润滑，维护费用低
- 通过稳定的法兰连接和额外的橡胶接头来保护驱动
- 泵室用双重低维护滑环密封
- 带有单面连接法兰的钢制泵壳，DN 150 PN 16
- 出水口连接法兰DN 150 PN 16
- 耐磨转子，由特殊淬火铬钼钢制成
- 耐磨损橡胶定子（可定制其它材质的定子，额外收费）
- 根据要求，可将其安装在热镀锌或不锈钢支架上

**The pump that supports
all sorts of media**

Standard equipment

Eccentric screw pump

- Offset drive motor with high operational factor for continuous operation
- Low-maintenance thanks to double bearings and oil bath lubrication
- Drive via stable flange joints and additional rubber joint protection
- Sealed with dual low-maintenance slide ring sealing on pump chamber
- Steel pump housing with single-sided connection flange DN 150 PN 16
- Steel outflow flange with connection flange DN 150 PN 16
- Wear-resistant rotor made of specially hardened Cr-Mo-steel
- Manure-resistant rubber stator (other qualities available at an extra charge)
- On request, it can be mounted on a galvanized console or a stainless steel console

来自客户的声音：

Stallkamp公司的HEX螺杆泵比其他公司的同类产品要好很多，功耗也大大降低。卧式偏心螺杆泵还可以输送很高干物质含量的物料（高达10 –12%）。常规的螺杆泵（最大9%DM含量）是不可能的。HEX螺杆泵性能强劲，运行非常安静。

我们非常满意！

"The HEX of Stallkamp sucks much better than comparable solutions with a rotary lobe pump and at a significantly lower power consumption. The eccentric screw pump also supports high DM content media (up to 10-12 %). This can't be achieved with conventional rotary lobe pumps (max. 9 % DM content). Despite the strong performance, the pump runs very quietly. **We are very satisfied.**"

SF粉碎机

Cutting system (SF)

粪尿中固体物质的完美粉碎机

电机功率 3,0 kW

- 从粪尿中滤出异物（木块、石头等），防止泵或类似设备出现故障和损坏
- 把物料中的长纤维粉碎
- 偏心的切削刀片带动物料滚动运动，将异物导入粉碎机的储藏室

优势

- 壳体密封由橡胶制成的径向轴密封圈和平密封。
- 有两个进料口和出料口，可以灵活使用
- 坚固的结构
- 通过一个大的清洗活门，轻松地清空异物储藏室
- 由于检查开口远离电机一侧，便于打开维护
- 刀片如有磨损可以更换同型号刀片

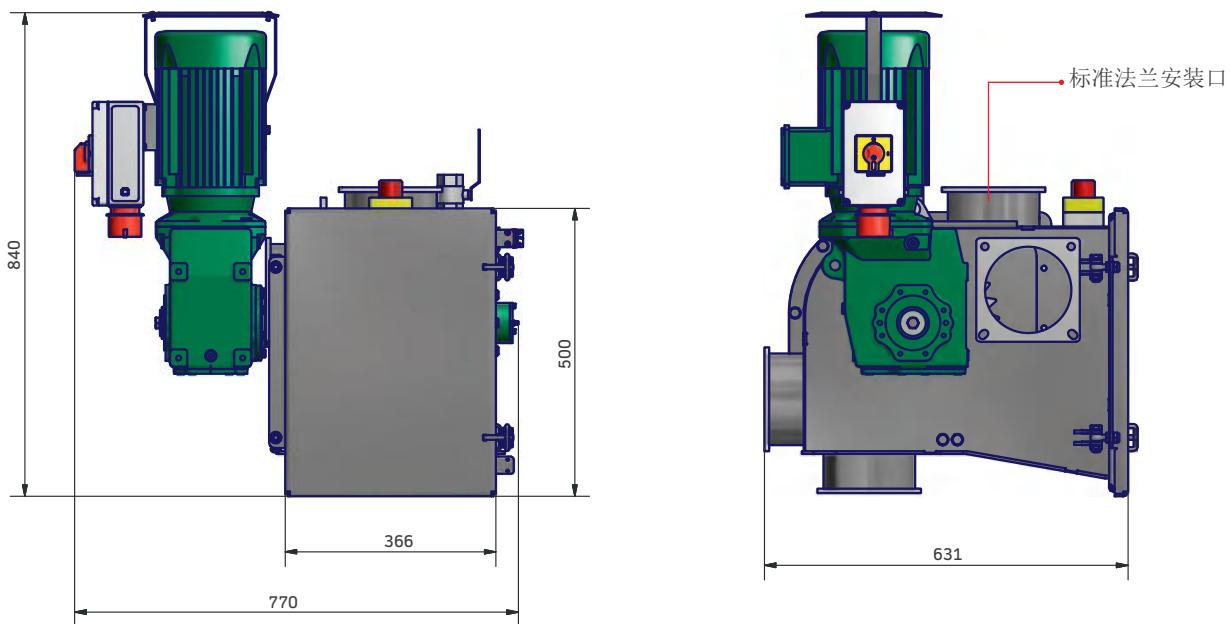

Perfect shredding of solids in manure

3.0 kW electric motors

- Filters out foreign bodies (wood pieces, stones, etc.) from manure to prevent faults and damages to pumps or similar equipment
- Shreds material with long fibres for a finer medium
- The offset cutting edges cause a rolling movement that conveys foreign bodies into the storage space

Advantages

- Housing sealed with radial shaft seal rings and flat seals made of resistant rubber
- Can be used flexibly thanks to two inputs and outputs
- Robust construction
- Easy emptying of the storage space by means of a large cleaning flap
- Simplified maintenance thanks to large housing covers on the side facing away from the motor
- Blade counterparts can be replaced if worn

适用于stallkamp的转子泵（DKP）和偏心螺杆泵(HEX)!

Ideal for use with Stallkamp rotary lobe pumps (DKP)
and eccentric screw pump (HEX)!

HKP高压离心泵

High pressure centrifugal pump

完美的高压力流量泵

使用和操作条件

- 为畜禽泵送液体饲料
- 输送饲料液体，如乳清、啤酒酵母、脱脂牛奶、粥、水等。
- 混合液体饲料
- 向罐体泵送物料
- 泵送干物质含量小的粪尿或者没有纤维含量的液体粪尿

**High flow pressure
in perfection**

Use and operating conditions

- Pumping of liquid feed for animal feeding
- Pumping of feed liquids such as whey, brewer's yeast, skimmed milk, porridge, water, etc.
- Mixing and washing round liquid feed
- Filling of storage tanks with liquid feed
- Pumping of thin manure and liquid manure without fibrous material

该泵被设计为需要高流量和功率消耗低的管道系统

特性:

- 泵壳体由耐腐蚀镍合金材料组成，表面由双组分塑料漆喷涂
- 叶轮采用耐腐蚀镍合金不锈钢材质
- 吸入侧连接 $2\frac{1}{2}$ " PVC标准法兰
- 压力侧连接2" PVC标准法兰
- 隔热等级F = 155°C、防护等级IP55
- 泵介质温度最高可达70°C

泵材料中耐腐蚀镍合金的含量超过20%。这使得该泵极其抗腐蚀。

The material Ni-Resist is characterized by an nickel content of more than 20 %. This makes Ni-Resist extremely resistant to corrosion.

The pump has been designed for pipe systems which require a high flow rate to power consumption ratio.

Description:

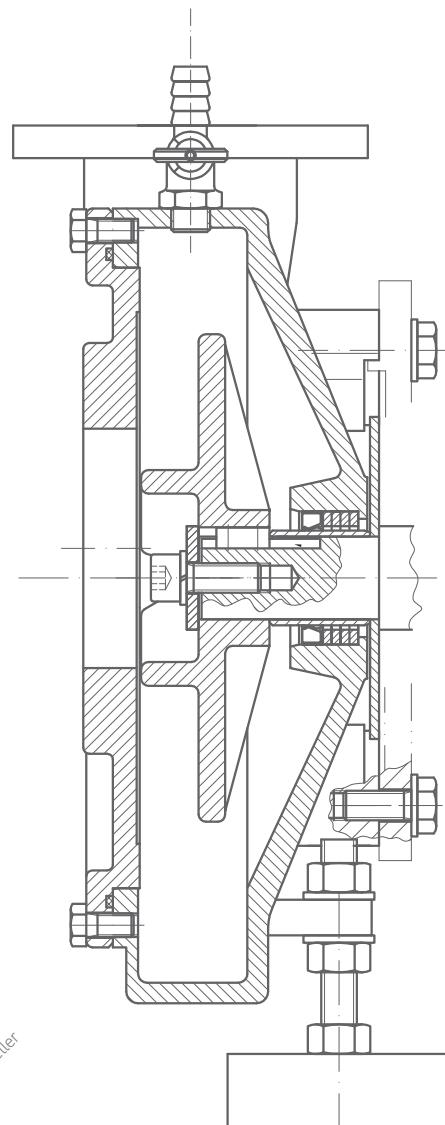

- Pump housing made from Ni-Resist stainless steel coated with 2-component plastic lacquer
- Pump impeller made from Ni-Resist stainless steel
- Suction side connection with $2\frac{1}{2}$ " PVC standard flange
- Pressure side connection with 2" PVC standard flange
- Insulating category F = 155 °C, Protection category IP55
- Pumping medium temperature up to max. 70 °C
